Establishing a Food Forest

Is it possible to live sustainably and grow an edible Food Forest? Join Permaculture teacher Geoff Lawton on an amazing journey from classroom theory to practical application. Geoff will take you through the emerging process of seeding a food forest, watching it grow and emerge a few years later by allowing Nature to do all the work. We end up in a lost food forest 10 years later as Geoff cuts through tall grass and see how it has emerged and grown when left to its own devices. One of our most popular titles.
